Excerpt: .often agitated by the heavy tones of an organ, and this led him to suspend glass dishes, and watch for any effect that might be produced by chords he was able to secure by the combination of different tones. He soon found that certain chords invariably resulted in the forcible agitation of objects at a distance. His earliest mechanism for noting the uniform force of sound-vibrations was a steel bar set full of pins of various lengths; while his first resonator or intensifier consisted of a shingle screwed to two hollow wooden tubes. The first engine was a simple ring of steel, with 300 pins set into it, and this first wheel ran in an open box, into and through which an observer was free to look while the wheel was in motion. For more than sixteen years Keely pursued his investigations in the...
